

Understanding Pharmaceutical Actions and Ingredients

Thursday, April 16 | 9am-4pm

At NITE, 503 E. Broadway, Mt Pleasant, MI

Come take a closer look at ingredients in commonly prescribed drugs, what they are made to do in the body or prevent the body from doing. Learn important remediation actions that can be taken to assist detoxification. This class will focus not only on understanding the effects of pharmaceutical drugs but more importantly real solutions that have powerful impacts. This class is designed for those outside the conventional medical model.
